

CHILDREN'S POLICY – 2013

Picking fresh blueberries with children is a perfect way to start a tradition or to pass on to the next generation.

We welcome well-supervised children. It is a joy to see families enjoying time together.

Guidelines:

Disinfect hands with provided hand sanitizer before and after picking.

Please remind children to pick while they are here and eat their blueberries at home. MN Dept. of Ag recommends washing all produce before eating.

For their safety, children must be next to an adult/guardian at all times.

We request that you only walk on the grass walkways. Shallow blueberry roots and irrigation lines are under the mulch.
